StratMin Global Resources Plc
("StratMin" or the "Company")

Production and Sales Update

StratMin (AIM: STGR), the graphite production and exploration company with assets in Madagascar, today provides an update on the production and sales of graphite for the month of March 2015.

Production

Production volumes were significantly up on the February numbers. Production numbers for the month of March 2015 were as follows:

Production Stage	Product	March 2015 (volume in tons)	February 2015 (volume in tons)
Beneficiation Plant	Wet Graphite	528	360
	Post de water, Pre Drier	281	194
Drier	Dry Mixed	91	130
Screening	-80mesh	55	35
	+80	51	48
	+50mesh	24	0

Production volumes have improved due to increased efficiency at the plant. Recovery levels increased significantly as a result of improved feed rates and flow management through the flotation cells. Grade has remained the same over the last quarter. Grades of the larger flake sizes remain higher than the smaller flake sizes at 90 - 92% vs. 88-90%.

The new mill has been installed and limited test runs have been performed. Development of the mill is ongoing with the plant flow sheet near to reaching increased grades particularly in the smaller flakes.

The new screen has been installed and drying and screening are now a continuous cycle. Commissioning issues resulted in drying capacity being temporarily restricted but the dryer is now functioning to design capacity. The Company expects to process the remaining wet graphite within April without delaying production.

Sales

215 tons of graphite were sold in March 2015 compared to 150 tons in February 2015. Prices remain confidential under the terms of the Offtake Agreement however, but the Company can confirm that as the graphite quality improves the price received by the Company increases.

The Company will now move to updating the market on its production and sales on a quarterly basis.

Manoli Yannaghas, StratMin's Managing Director, commented:

"I am delighted to report a significant increase in both graphite production and sales during the month thereby making March StratMin's most successful month to date. These increases coupled with the new mill soon to become fully operational will see the Company's efforts over the last two years come to fruition."

"The product quality has improved markedly over the quarter, much to the satisfaction of our customers. Further improvements to the process flowsheet are underway to increase grade and I expect these to have a positive effect during the next quarter"

Competent Person's Statement

The information in this announcement that relates to the production and sales figures has been reviewed by Mr. Neville Cowin, C.Eng, BSc (Eng), ARSM, MIMMM registration (C.Eng 325393). Mr. Cowin is an independent consultant with over 40 years of production experience, and works with the Company to advise on improving performance at the plant. Mr. Cowin is a "Qualified Person" as defined in the AIM Note for Mining Oil & Gas Companies - June 2009, of the London Stock Exchange. Mr. Cowin consents to the inclusion of the information in this release in the form and context in which it appears.
